

Terms of Reference for the CSLF Projects Initiation and Review Panel (PIRP)

- One of the main instruments to help the CSLF achieve its goals will be through the initiation, recognition and monitoring of CSLF projects.
- By responding to the gaps and priorities identified in the CSLF technology roadmap, the CSLF projects will be a key element in generating and exploiting the knowledge that may lead to improved CCS technologies.

Terms of Reference for the CSLF Projects Initiation and Review Panel (PIRP)

- It is therefore of major importance to have appropriate mechanisms within the CSLF for the generation, recognition, progress review and full exploitation of projects and their results for the benefit of the CSLF and its Members.

CSLF Project Initiation and Review Panel (PIRP)

- Assess projects proposed for recognition by the CSLF.
- Review the CSLF project portfolio and identify synergies, complementarities and gaps, providing feedback to the TG and input for further revisions of the CSLF roadmap.

CSLF Project Initiation and Review Panel (PIRP)

- Foster enhanced international collaboration for CSLF projects, both within individual projects (e.g. expanding partnership to organizations from other CSLF members) and between different projects addressing similar issues
- Review the progress of each CSLF project and of the technologies under development in the overall portfolio, providing input for revisions of the roadmap.

CSLF Project Initiation and Review Panel (PIRP)

- Promote awareness of new developments in CO₂ Capture and Storage and of progress within the CSLF recognized projects and beyond by establishing and implementing a framework for periodically reporting to the TG on the progress of CSLF projects
- Propose follow up actions leading for example to new projects to address the barriers to CO₂ C&S and make recommendations on possible funding vehicles for these actions

CSLF Project Initiation and Review Panel (PIRP)

- Organize periodic “project review meetings” to facilitate the fulfillment of the above functions and give an opportunity to stakeholders involved in projects and other relevant stakeholders invited by the CSLF, to exchange experience and views on issues of common interest in order to make suggestions to the CSLF on best practices for project development and implementation etc.

Members of the PIRP

- The Panel would consist of:
- CSLF members of the technical group or their representatives (one per member)
- One (or more) representative(s) of each CSLF recognized project with overall management responsibility in the project (e.g. Project Manager)
- The Panel Chair should be nominated by the TG for the approval of the Policy Group.

Operation of the PIRP

- The Panel should meet periodically possibly before TG meetings, to which they should report at least once a year.
- Broader CSLF project review workshops should be organized periodically as appropriate
