the current CSLF meeting.]*

Secretariat Report to Technical Group

Other Outcomes from Venice Technical Group Meeting

- BECCS Task Force issued final report and has completed its activities.
- Task Force on Hydrogen with CCS has completed its “Phase 0” activities and will not continue further. Instead, a workshop on Hydrogen with CCS will be organized for a future CSLF meeting.

Secretariat Report to Technical Group

Other Outcomes from Venice Technical Group Meeting

- Technical Group formed a new Task Force to examine non-EOR CO₂ utilization options.
 - Plan and Timeline to be presented at next Technical Group meeting.
 - Task force members include United States (Chair), Australia, Canada, France, the Netherlands, and Saudi Arabia.

Secretariat Report to Technical Group

Other Outcomes from Venice Technical Group Meeting

- Technical Group formed a new working group to follow-up on recommendations from TRM.
 - Will also include measuring the use of Technical Group task forces as well as alignment with Academic Task Force and Communications Task Force.
 - Working Group Chair is United States (Sallie Greenberg).

Secretariat Report to Technical Group

Other Outcomes from Venice Technical Group Meeting

- CCS for Energy Intensive Industries Task Force and Improved Pore Space Utilisation Task Force will both present final reports at next Technical Group meeting.
- Technical Group will not form a new task force on CO₂ Capture and Storage by Mineralization, as it was deemed premature to do so.
